Web Services

Web Bill of Lading (WEBBOL)

Why can't shipping be simple, easy, and affordable?

Business is rapidly changing. Are you ready to keep up with the pace? Clark Freightways can help you meet today's challenges by uniting cutting-edge innovations in technology with the expertise we've gained from over 50 years of experience.

We know time is money. That's why we've made the shipping experience as quick and as simple as possible with our convenient and easy-to-use Web Services. With this suite of online tools, you have full shipping, tracking, and document retrieval capabilities.

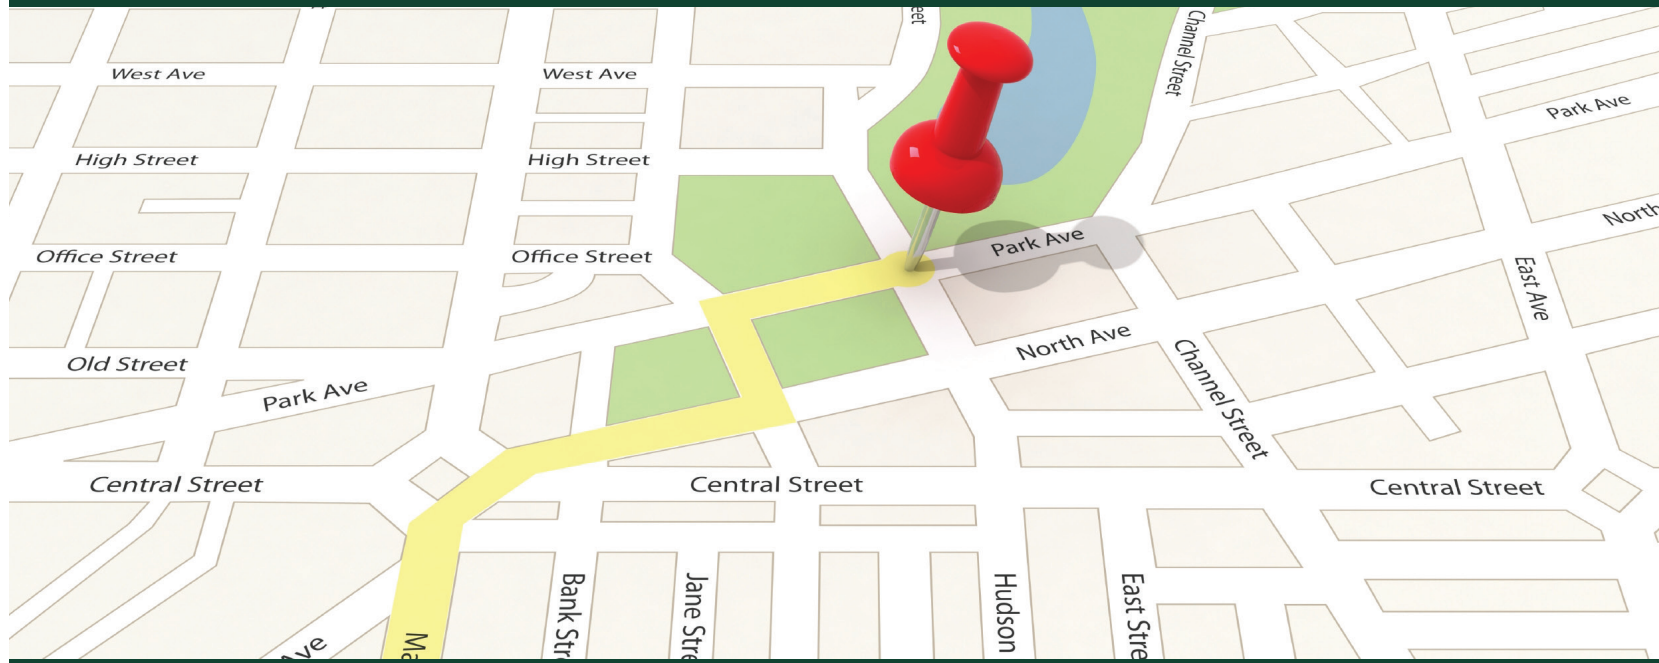

It's all at your fingertips.

At the heart of our web services is our proprietary and intuitive Web Bill of Lading system, which allows you to easily create your own BOLs in seconds through the use of pre-populated customer data and simple drop-down menus.

No more duplication or repetitive data entry. Our Web Bill of Lading system allows you to quickly create, store, and utilize templates for recurring orders to further save you time. Templates can be pre-configured for any of the Bill of Lading fields, including specific customers, service requirements, and even commodities. Simply key in the number of shipping units, and you're done!

At your convenience, you can schedule pickups online and receive confirmation and tracking details for all your orders. You can also print BOLs and shipping labels and archive BOLs for later analysis.

Other web-based services

Easily Track & Trace your orders online.

With Clark, you never have to worry about where your shipments are. Our GPS-equipped drivers provide you with real-time updates, allowing you to easily track and trace orders online using your own reference, Bill of Lading, or purchase order numbers.

Delivery confirmation via email—in real time!

Imagine the time-saving benefits of receiving real-time delivery confirmation or exception notification via email mere moments after delivery. With Clark, you can receive all your shipment alerts through email in real time.

*e-*Invoicing simplifies your paperwork, cuts costs (and makes you greener).

Want to organize your files, cut costs, and be environmentally responsible at the same time? Switch to electronic invoicing and receive statements and invoices conveniently by email.

Image retrieval at your convenience.

With Clark's web services, you can retrieve stored copies of Proofs of Delivery, Bills of Lading, or Electronic Invoices from our secure web network whenever you need them.

Below is a brief summary of some of the core capabilities of our web services module:

- Save time and money using our interactive Web Bill of Lading – create your BOL's on-line in seconds, create templates for recurring orders, print labels and archive BOL's for historical analysis.

- Schedule and create pickups on-line at your convenience, and receive a booking confirmation and shipment tracking details.

- Trace orders using your own reference, bill of lading, or purchase order number

- View or download copies of Proof of Deliveries (POD), Bill of Ladings (BOL) or Electronic Invoices via our secure web network

- Shipment alert; receive real-time delivery confirmation or exception notification via email

- Go green and receive electronic invoicing and secure retrieval of statements and invoices at your convenience
